# Our Featured Services

iView<sup>®</sup>

## Healthcare IT Consulting

Innovative solutions for enhancing healthcare IT infrastructure and workflows.

## Healthcare IT Staffing

Sourcing qualified candidates to meet healthcare IT staffing requirements efficiently.

## Healthcare AI/ML

AI/ML innovations driving efficiency and accuracy across healthcare processes.

## Healthcare Digitalization

Leveraging digital technologies to drive innovation & efficiency in healthcare.

# Our Work

## DocDok Health (Switzerland)

DocDok Health is in one of the top 50 swiss healthcare products and is also now in the Gold List of Swiss Innovation program

### Challenge:

DocDok AG faced the challenge of scaling their development capabilities to meet the increasing demands of their healthcare technology projects. They sought a solution to establish dedicated offshore development teams that could seamlessly integrate with their existing workflow and be managed effectively by their Israel-based CTO.

### Solution:

iView Labs' collaboration with DocDok AG in setting up dedicated offshore development teams exemplifies the effectiveness of strategic outsourcing in driving business growth and innovation. By leveraging offshore talent and expertise, DocDok AG was able to scale their development capabilities, enhance productivity, availability, and reliability, and accelerate their journey towards achieving their business objectives

# Our Work

## Bulwark Shield (Canada)

IoT based temperature monitoring Hardware designing and application development.

### Challenge:

The Canadian manufacturing firm faced challenges in monitoring and maintaining optimal temperatures during production processes. They sought a solution to enhance temperature monitoring accuracy, reliability, and efficiency while ensuring compliance with industry standards and regulations.

### Solution:

iView Labs' collaboration with the Canadian manufacturing firm in developing the Bulwark Shield application exemplifies the power of technology in addressing complex industrial challenges. By providing expertise in hardware, firmware, and application development, iView Labs helped the manufacturing firm enhance temperature monitoring accuracy, reliability, and efficiency, contributing to operational excellence and product quality.

# Our Work

## Temperature Monitoring App (United States)

A mobile app to track and monitor biotech drugs shipment for life sciences industry.

### Challenge:

MaxQ faced the challenge of effectively monitoring and managing their blood package coolers deployed in various locations. They sought a solution to track real-time data and performance metrics of their coolers, enabling proactive maintenance and optimizing operational efficiency.

### Solution:

iView Labs' collaboration with MaxQ in developing a real-time analytics dashboard for blood package cooler monitoring exemplifies the power of data-driven solutions in enhancing operational visibility, efficiency, and reliability. By leveraging advanced analytics and visualization techniques, MaxQ was able to optimize the performance of their coolers, ensure compliance with regulatory standards, and deliver superior value to their customers in the healthcare sector.

# Our Work

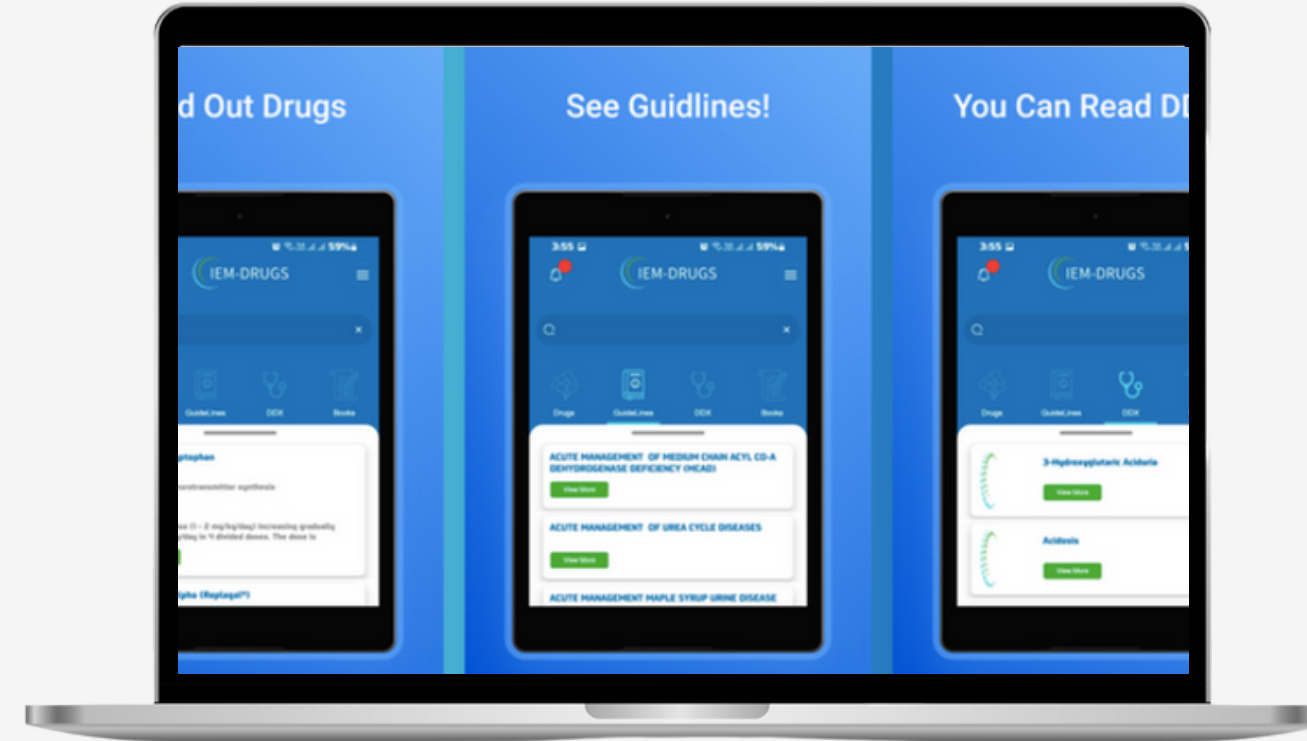

## Healthcare CMS [IEM Drugs] (Saudi Arabia)

IEM Drug App is a medical journal app for physicians and researchers which enables users to have medical awareness in terms of providing Drug's information and latest medical publications.

### Challenge:

The healthcare professional faced the challenge of managing and accessing drug information efficiently, especially in fast-paced clinical settings. They sought a solution to centralize drug data and provide a user-friendly mobile app interface with quick search capabilities to enhance productivity and decision-making.

### Solution:

iView Labs' collaboration with the Saudi Arabia-based healthcare professional in developing the IEM Drug CMS mobile app with a quick search feature exemplifies the power of technology in enhancing efficiency and productivity in healthcare settings. By leveraging mobile app development expertise and user-centric design principles, iView Labs successfully addressed the healthcare professional's need for centralized drug information management, empowering them with quick and easy access to essential drug data.

# Our Work

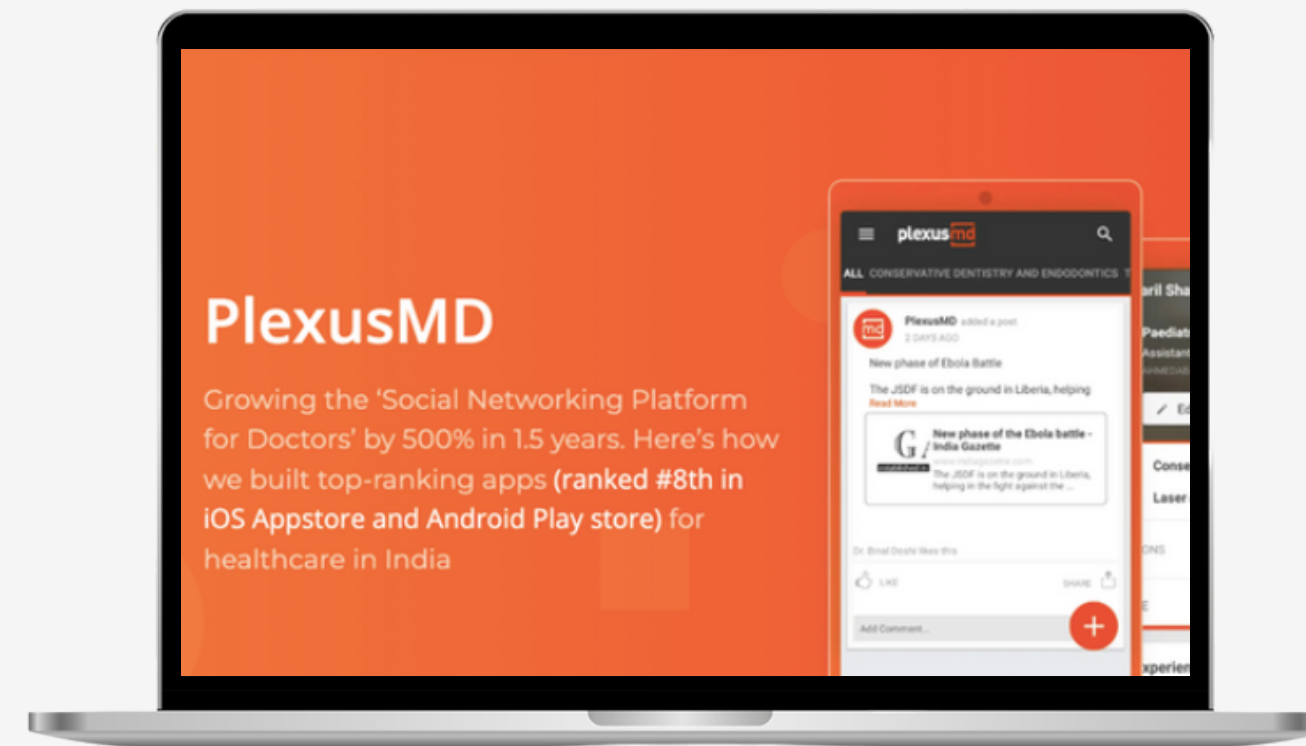

## Healthcare Social Network - PlexusMD (India)

360° Tech consulting and Development | Web, Mobile & Backend Server Infrastructure.

### Challenge:

The founding team of PlexusMD faced the challenge of creating a robust and user-friendly social networking app tailored to the needs of healthcare professionals. They sought a solution to streamline communication, provide valuable resources, and build a vibrant community where healthcare professionals could connect and share knowledge seamlessly.

### Solution:

iView Labs' collaboration with the founding team of PlexusMD in developing the healthcare social networking app exemplifies the transformative impact of technology on healthcare communication and collaboration. By creating a platform that connects healthcare professionals, facilitates knowledge sharing, and fosters community engagement, iView Labs helped PlexusMD realize their vision of revolutionizing healthcare communication and advancing the practice of medicine.

# Our Work

## Smart Healthcare System for Doctors (India)

Centralized Cloud management system for doctors to manage their patients and their appointments.

### Challenge:

Healthcare clinics faced challenges in managing patient registration, maintaining accurate records, and optimizing patient queues efficiently. They sought a solution to digitize and automate these processes, enabling seamless data management and queue management while enhancing clinic operations and patient satisfaction.

### Solution:

iView Labs' collaboration with healthcare clinics in developing Prapp exemplifies the transformative impact of technology on clinic operations and patient care. By creating a user-friendly patient registration app with queue management capabilities, iView Labs helped clinics improve efficiency, enhance patient experience, and achieve operational excellence.

# Our Work

## Open Source CRM Integration (India)

AirmedPath Lab faced the challenge of streamlining their customer relationship management (CRM) processes and enhancing their communication channels.

### Challenge:

AirmedPath Lab faced the challenge of streamlining their customer relationship management (CRM) processes and enhancing their communication channels. They sought a solution to integrate a CRM system seamlessly into their operations and implement virtual calling capabilities for improved customer interactions.

### Solution:

Understanding AirmedPath Lab's unique requirements, we recommended integrating the open-source vTiger CRM platform into their workflow. This comprehensive CRM solution provided them with robust tools for managing customer relationships, streamlining sales processes, and enhancing team collaboration.

# Our Work

## An Augmented Reality Solution for Biocon (India)

iView Labs collaborated with Biocon, a leading biopharmaceutical company, to introduce an innovative Augmented Reality (AR) application for the launch of their new injection product.

### Challenge:

Biocon faced the challenge of effectively showcasing the features and benefits of its new injection product during the launch event. They sought a solution to captivate attendees' attention and convey complex manufacturing details in an engaging and interactive manner.

### Solution:

iView Labs' collaboration with Biocon in developing an AR application for their product launch exemplifies the power of immersive technology in enhancing brand engagement and communication. By leveraging AR to provide users with an interactive and informative experience, Biocon successfully showcased their new injection product and left a lasting impression on attendees.

# Our Work

## A Multitouch Quiz and Puzzle Solution for Intas (India)

iView Labs partnered with Intas, a leading pharmaceutical company, to elevate its expo experience through innovative engagement solutions.

### Challenge:

Intas faced the challenge of creating a memorable and interactive experience for expo attendees. They sought a solution to engage visitors effectively while gathering valuable insights into attendee preferences and interests.

### Solution:

iView Labs' collaboration with Intas in developing multitouch quiz and puzzle games for their expo exemplifies the power of innovative engagement solutions in enhancing brand visibility and attendee interaction. By leveraging technology to create immersive experiences and gather valuable data insights, iView Labs helped Intas achieve its expo objectives and leave a lasting impression on attendees.
